ARIE Single

For ARIE Single, each document will be split automatically by every single-page. ARIE uses the content it sees on each page to file them according to your Single Distribution Rules.

Always test new rules with a few documents before filing several at once, just to be sure everything is going where it should.

From the menu on the left-side of the screen, click Admin, then click Distribution Rules under the column: <u>ARIE Management</u>.

Add ARIE Single Distribution Rule

1. Click the Add Distribution Rule button.

- 2. Enter the Distribution Rule Name. Just a simple name so you know what the rule applies to.
- 3. Select the "Single" Rule Type.
- 4. Enter the Priority Order Number. This is the sequence order ARIE uses when trying to file documents through your Single distribution rules. For the most part, you can just keep going in a normal sequence (1, 2, 3, 4, 5), but it is recommended to put your more specific rules with more qualifications that need to be met first, to rule those in or out right away
 - $\circ\,$ If you would like to include a Doc Name Prefix for the documents, you have the option of entering one per rule.
 - $\circ\,$ If you want to include a Template (zonal capture) with your ARIE Single rule, you have the option of selecting one per rule.
 - $\circ\,$ By default, the box Active box will be checked. Only uncheck this box if you do not want the rule to be used.
 - By default, the box will be checked to Keep Cover Pages. Keep this checked.
 - $\circ~$ If you want ARIE to use your Workflow Business Rules, check the Use Workflow Business Rules box.
 - When ARIE is trying to file a document through a distribution rule, it is scanning the content on the first page of the document. By choosing the Custom OCR, you are saying where on the first page ARIE is looking for content to file the document. For example, if you chose #4, then ARIE would only be looking for content in the top-half of the first page.
- 5. Under Document Details, select the Doc Type you want documents filed as.
 - $\circ\,$ Doc Field: If you would like ARIE to automatically merge new documents to existing

documents that contain the same metadata, you can select which metadata field(s) ARIE will use for the document merge. If you want documents to be filed into PinPoint as new documents, you should not use this feature.

- 6. Under Folder Details, select the Cabinet and Sub-Divider you want documents file to. <u>If you</u> <u>select an Exclusive Sub-Divider for your rule</u>, be sure to use the Link to Folder function add <u>link the folder that the exclusive sub-divider is assigned to</u>.
- 7. Add at least one Folder Field. The folder field you choose is what ARIE will look for on the first page of a document to indicate the folder it should go into. You can add more than one folder field using AND/OR logic, as well.
- 8. Under Search Text, enter a word or phrase that exists on the first page of the document that will help ARIE match the document to a distribution rule. You can add multiple Search Text words/phrases using AND/OR logic, as well.
- 9. Once you are finished, click Save.

Copy ARIE Single Distribution Rule

When you copy a distribution rule, everything except for the Rule Name and Priority will be different. After making your copy, you must update the Priority number, so the rule is used.
